LET THE BOOKS ALONE.

The experiment of public school systems is one which will be charged with the most important consequences for the welfare of the country. If the system of public schools is properly established, it will be found in the hands of the best men, and will be administered in a manner which will secure the best educational results. If, on the other hand, the system is not properly established, it will be found in the hands of the worst men, and will be administered in a manner which will secure the poorest educational results.

To those who are not in a position to judge of the educational results of the public schools, it may be said that the system of public schools is the best system of education that can be devised for the general welfare of the country. The system of public schools is the best system of education that can be devised for the general welfare of the country. The system of public schools is the best system of education that can be devised for the general welfare of the country.

FAIRHAVEN

On Bellingham Bay.

The town of Fairhaven is situated on the north side of the Strait of Juan de Fuca, in Washington Territory. It is a seaport town, and is connected by a railroad with Seattle, the terminus of the Northern Pacific Railway. The town is well built up, and has a fine harbor, with good facilities for shipping and trade.
